

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) Rubber material, ~~in particular for wiper blades of windshield wipers or for automotive tires~~, containing at least one grade of rubber, at least one filler and processing aids, characterized in that the filler is comprised of a mixture of at least two different grades of carbon black.
2. (Original) Rubber material according to Claim 1, characterized in that the filler is comprised of a mixture of furnace black and thermal black.
3. (Previously Presented) Rubber material according to Claim 1, characterized in that the rubber contains 40 to 320 parts by weight of the filler based on 100 parts by weight of elastomer.
4. (Previously Presented) Rubber material according to Claim 1, characterized in that it contains a plasticizer and/or mineral oil.
5. (Previously Presented) Rubber material according to Claim 1, characterized in that the grade of rubber is EPDM, EPR, BR, SBR, IR or CR.
6. (Previously Presented) Rubber material according to Claim 1, characterized in that at least one of the rubber grades has a first and a second fraction which differ in viscosity in the unvulcanized state.
7. (Original) Rubber material according to Claim 6, characterized in that the first fraction has a Mooney viscosity of 20 to 95 Mooney.
8. (Previously Presented) Rubber material according to Claim 1, characterized in that the rubber material is essentially free of calcium oxide.

9. (Previously Presented) Rubber material according to Claim 1, characterized in that the rubber material is essentially free of zinc oxide.

10. (Previously Presented) Wiper blade for a windshield wiper comprising a rubber material containing at least one grade of rubber, at least one filler and processing aids, characterized in that the filler is comprised of a mixture of at least two different grades of carbon black.

11. (Original) Wiper blade according to Claim 10, characterized in that a head part (1) and/or a web (2) of the wiper blade is made of EPDM and/or CR and a wiper lip (4) of the wiper blade is made of BR.

12. (Previously Presented) Wiper blade according to Claim 10, characterized in that the filler is comprised of a mixture of furnace black and thermal black.

13. (Previously Presented) Wiper blade according to Claim 10, characterized in that the rubber contains 40 to 320 parts by weight of the filler based on 100 parts by weight of elastomer.

14. (Previously Presented) Wiper blade according to Claim 10, characterized in that it contains a plasticizer and/or mineral oil.

15. (Previously Presented) Wiper blade according to Claim 10, characterized in that the grade of rubber is EPDM, EPR, BR, SBR, IR or CR.

16. (Previously Presented) Wiper blade according to Claim 10, characterized in that at least one of the rubber grades has a first and a second fraction which differ in viscosity in the unvulcanized state.

17. (Previously Presented) Wiper blade according to Claim 16, characterized in that the first fraction has a Mooney viscosity of 20 to 95 Mooney.

18. (Previously Presented) Wiper blade according to Claim 10, characterized in that the rubber material is essentially free of calcium oxide.

19. (Previously Presented) Wiper blade according to Claim 10, characterized in that the rubber material is essentially free of zinc oxide.
